

## Setting Ourselves Apart

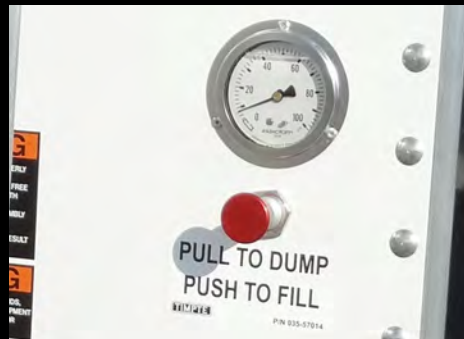

1. TimpTE Sidewall Emblem; was inspired by the automotive industry. This chrome plated design will set your trailer apart in both directions. We take pride in what we do, so every detail counts to give you a trailer that's tough with style.
2. Front and Rear Decal; slightly modified from the traditional TimpTE logo, this reflective decal forms with the radius of the tarp cap giving a streamlined look that contours to the trailers shape and design.

## Air Ride System Controls

1. Relocated "Air Ride System Pressure Gauge and the Dump Valve" to the nose of the trailer where it is immediately accessible to the operator on all trailers. \*Does not apply to tri-axle trailers with lift axle(s).
2. For trailers with a front lift axle option, those controls will also be mounted on the nose of the trailer

Moved to the Nose of the Trailer

## Tub Style Changes

1. Upgraded tub designs on the 40', 42'2", 102W split tubs and on the 43', 48', and 50' trailers from the riveted tub corner design to the formed tub panel design that we utilize currently on all other tub configurations.
2. This tub design improves hopper clean out and enhances the hoppers appearance.

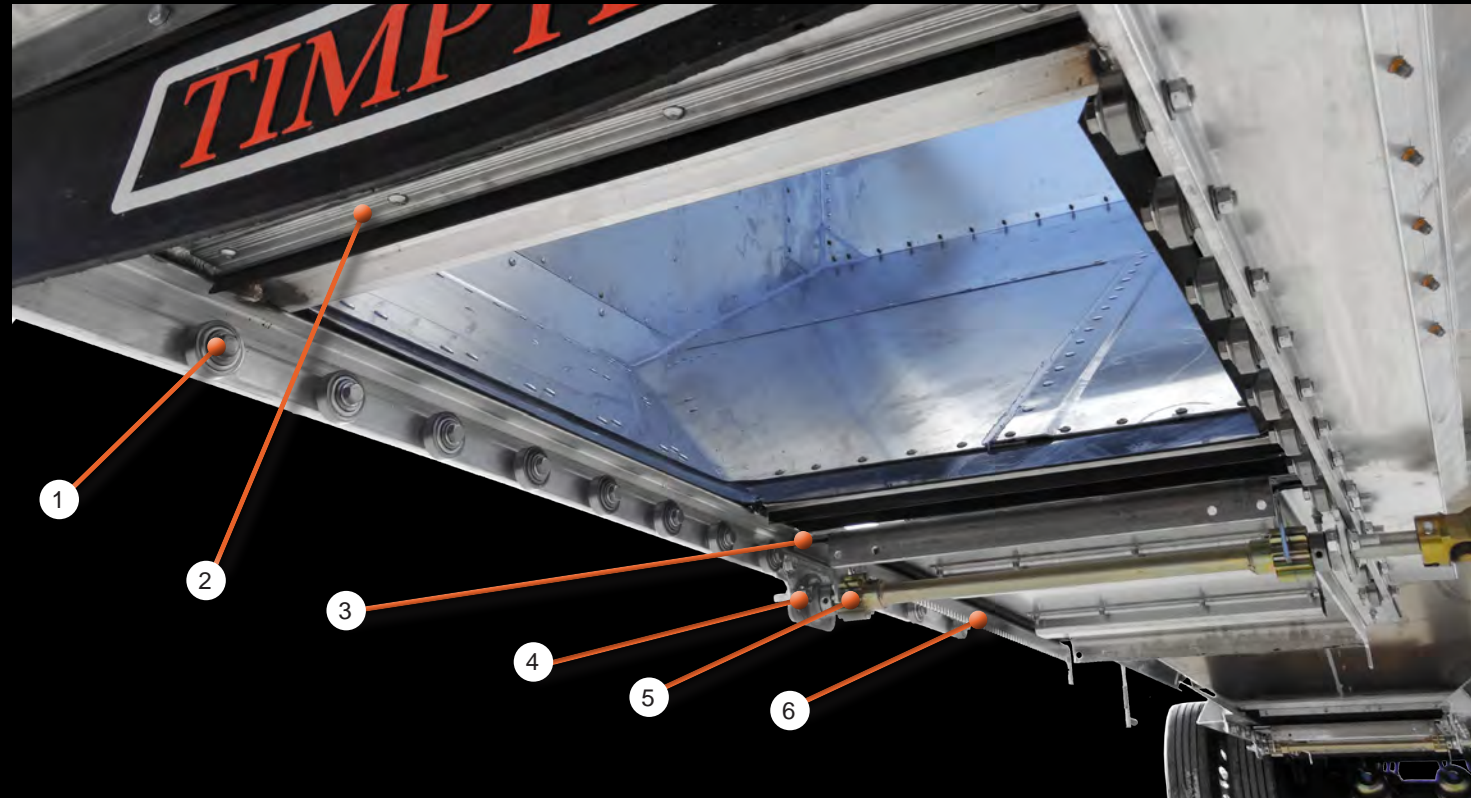

# 2017 Standard Upgrades

## CONTINUOUS IMPROVEMENT IS OUR MOTTO AND WE STICK TO IT.

In 2008, we took an unprecedented step by opening our very own research and development center dedicated to improving and testing our products. Having our focus on one market allows us to provide you with a high quality product that is backed by a warranty that's unmatched in the industry.
