# EASY FLOW HYDRAULIC TRAP

At the flip of a switch the operator can gradually open and close both hoppers, using the weather resistant control box.

The operator can stay out of the dust by opening the trap from the cab of the truck, using our easy to use RF wireless remote.

Premium biodegradable hydraulic fluid flows from the reservoir in the apex to the cylinders through stainless steel lines that won't rust or corrode.

Faster unloading at the bin site with NO, trap operator handle or brackets to interfere with auger leg. Improved resale value at trade in time.

### Timpte Easy Flow Hydraulic Trap Features & Benefits

- Patented Design, Developed, Serviced, & Warranted by Timpte
- Very competitive price compared too many electric or hydraulic systems
- Low Maintenance Cost
- Removal of the steel track will eliminate rust jacking
- Motor & all electrical connectors are sealed to keep out moisture & corrosion
- Premium biodegradable hydraulic fluid is rated at -40 degrees and made from U.S. grown seed oils
